

UNIVERSITY OF WASHINGTON
Aerospace & Energetics Research Program

Postdoctoral Positions in Plasma Physics

The Aerospace & Energetics Research Program at the University of Washington invites applications for post-doctoral positions in the newly formed Plasma Science and Innovation Center. The Center will refine present computational tools with sufficient physics, boundary conditions, and geometry to be calibrated with experiments to achieve predictive capabilities for Innovative Confinement Concepts experiments. Applicants with strong theoretical and/or computational backgrounds in the area of physics of magnetically confined plasmas are sought.

An earned Ph.D. in physics or engineering is required. Interested individuals should send a letter of application, detailed resume, representative publications, and a list of three references, all in hard-copy format only, to:

Professor Thomas R. Jarboe, Center Director
Aerospace & Energetics Research Program
University of Washington
Box 352250
Seattle, WA 98195-2250

For information about our center, visit our website at <http://plasma.aa.washington.edu/psicenter/>. The positions will remain open until it is filled.

The University of Washington is an equal opportunity, affirmative action employer. Applications from women, minorities, individuals with disabilities, and covered veterans are strongly encouraged.
